

Survey Results: Building Regional Resilience for the Central Coast

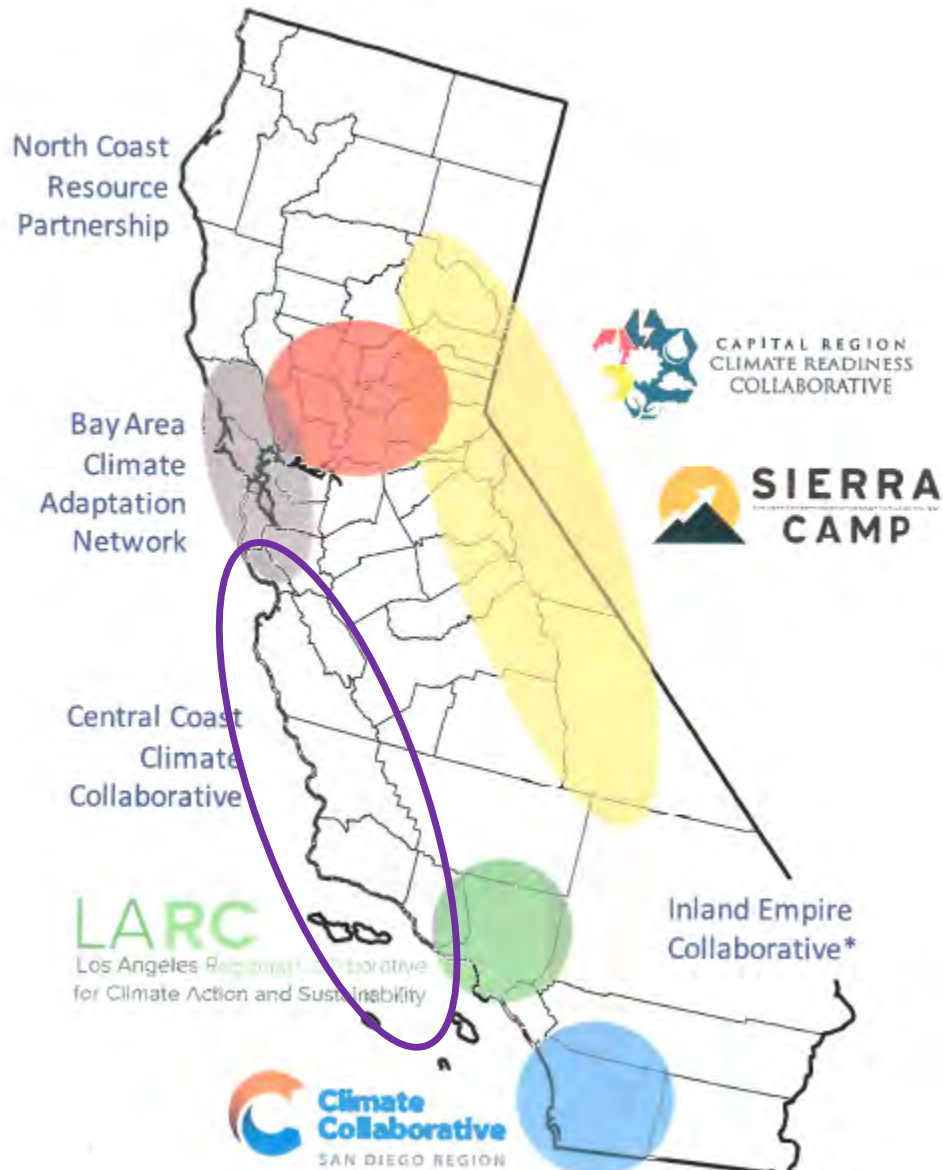

Santa Cruz County
San Benito County
Monterey County
San Luis Obispo County
Santa Barbara County
Ventura County

4C Mission

- Membership organization fostering a network of local and regional community leaders to address climate change mitigation and adaptation.
- Representatives from local and regional government, business and agriculture, academia, and diverse community groups
- Shares information and best practices, leverage efforts and resources and identify critical issues and needs.
- Engages with other collaboratives throughout the state.
- 4C will engage all communities throughout the region **to help ensure a resilient and low-carbon Central Coast** prepared for the impacts of climate change.

Juliano Calil – Middlebury Institute of International Studies
Jacques Bertrand – City of Capitola
Ross Clark – Central Coast Wetlands Group
Vince Kirkoff – San Luis Obispo County
Tiffany Wise-West – City of Santa Cruz

Who Responded to the Survey?

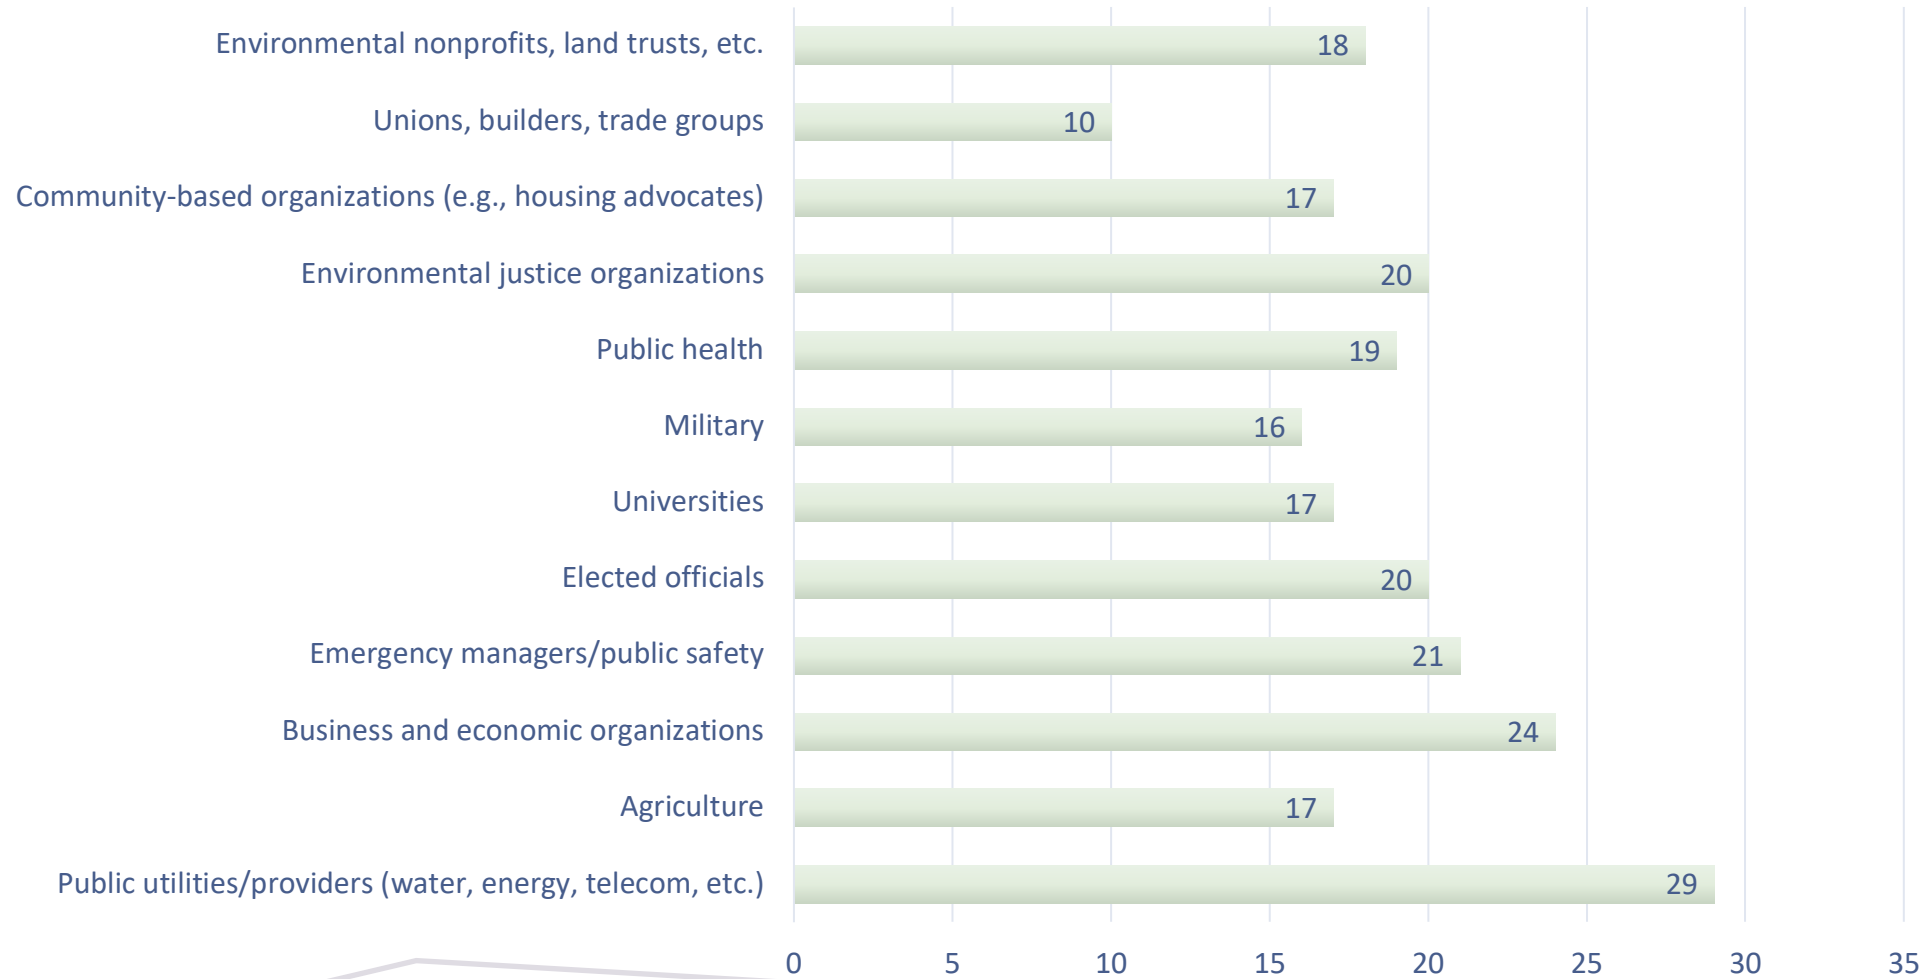

Respondents were primarily from coastal areas.

Total Responses: 40

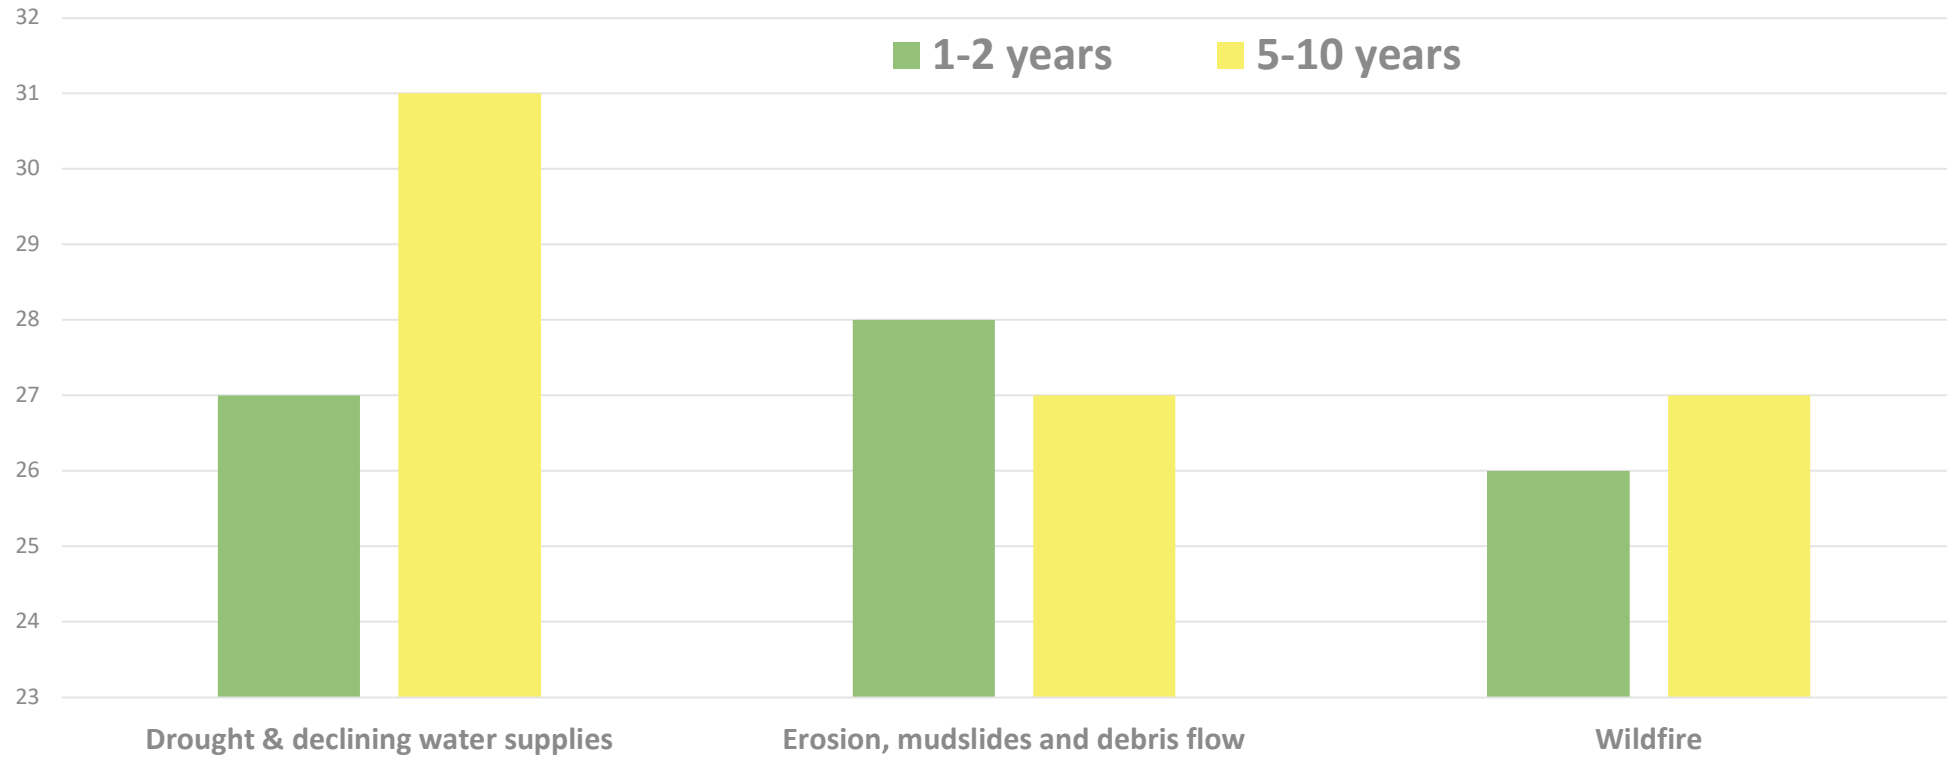

ENGAGEMENT & REGIONAL COLLABORATION

Which sectors would you like to see more engaged in resilience planning and implementation?

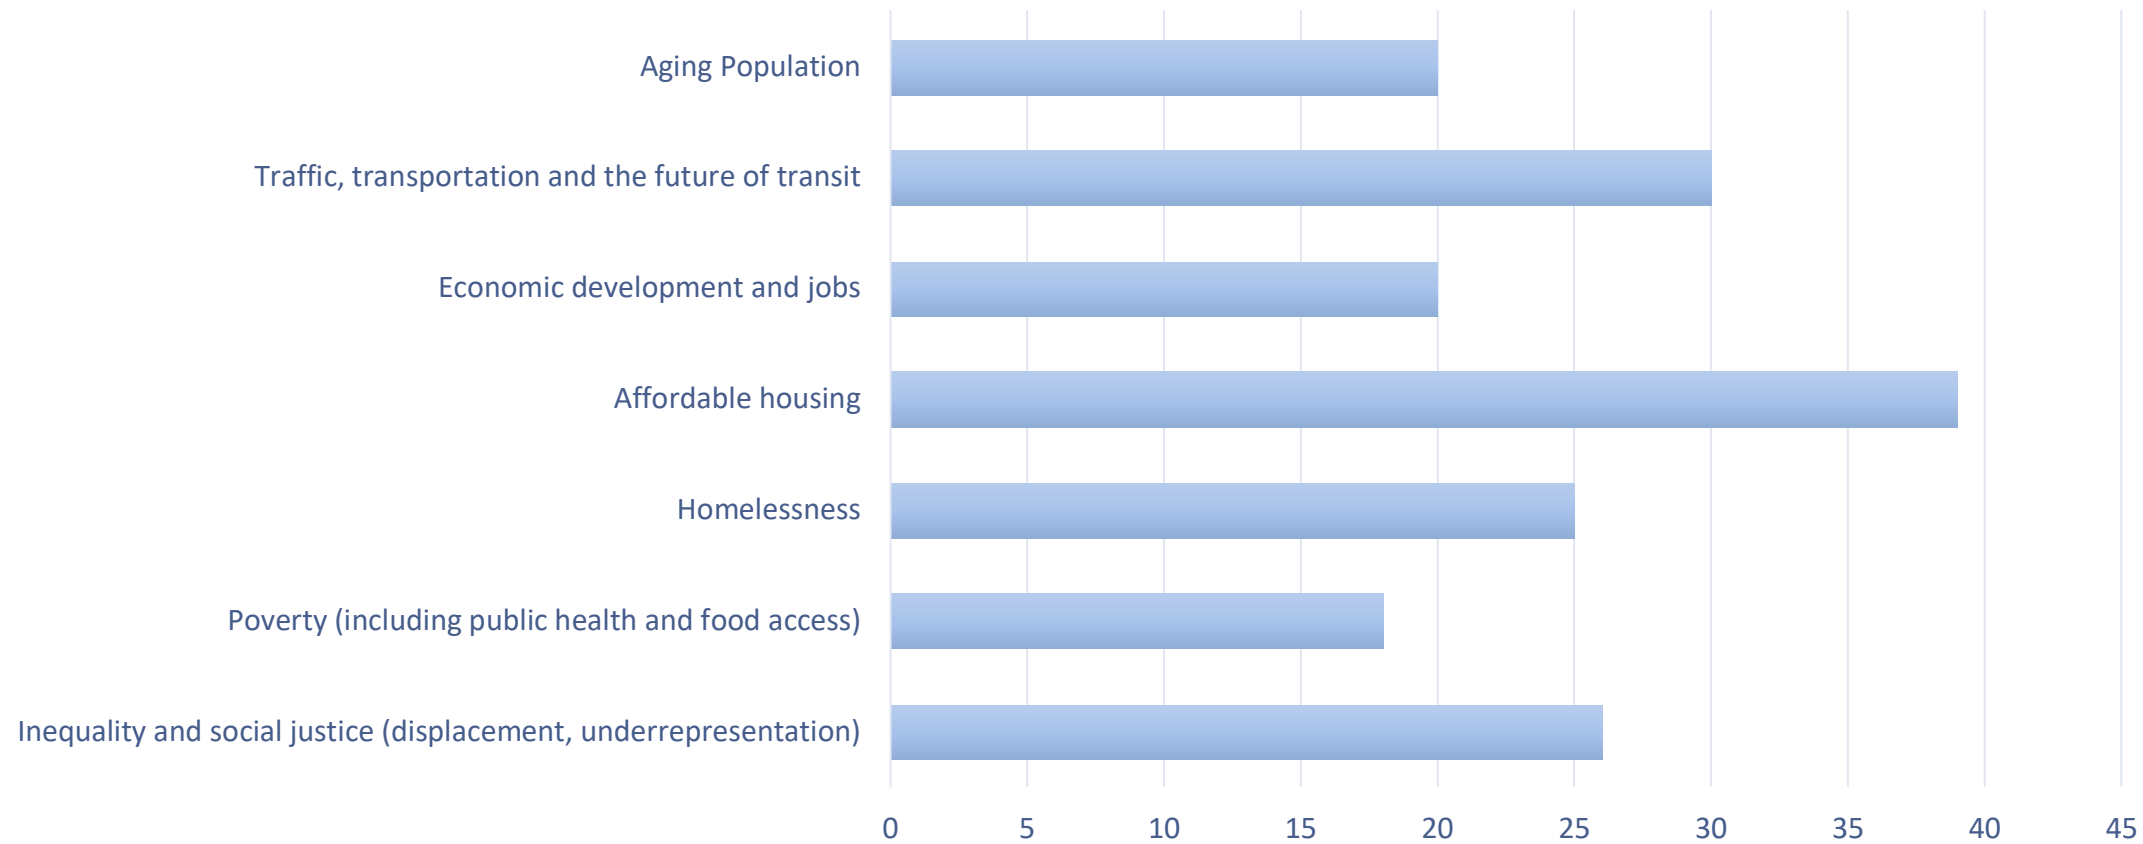

HAZARDS & ASSETS

Top 3 Natural Hazard Concerns

Which critical socioeconomic issues is your jurisdiction facing?

Which assets in your community are at risk from natural hazards?

VULNERABILITY ASSESSMENTS

Covered later today

FINANCING

- It's time to **diversify the 4C community's resilience project funding** sources; the respondents are heavily dependent on federal funding for resilience projects.
 - 71 % respondents use external grants as their main finance source
- There is a opportunity to develop **self-reliant funding sources** for resilience in the Central Coast through local or regional ballot measures to provide voter approval for special taxes or general obligation bonds.
 - Of those responding, only one "yes" came in on use of this type of resource

FINANCING

- The potential to develop **joint partnership funding proposals** is very strong
 - 83% responded that they would work on jointly funded projects.
- Another promising avenue of resilience funding is the **re-purposing of existing** general fund, capital improvement monies, and other internal allocations for resilience implementation.
 - 46% of respondents hadn't tapped internal organizational/agency funds for this purpose
