Aligning Strategies to Funding

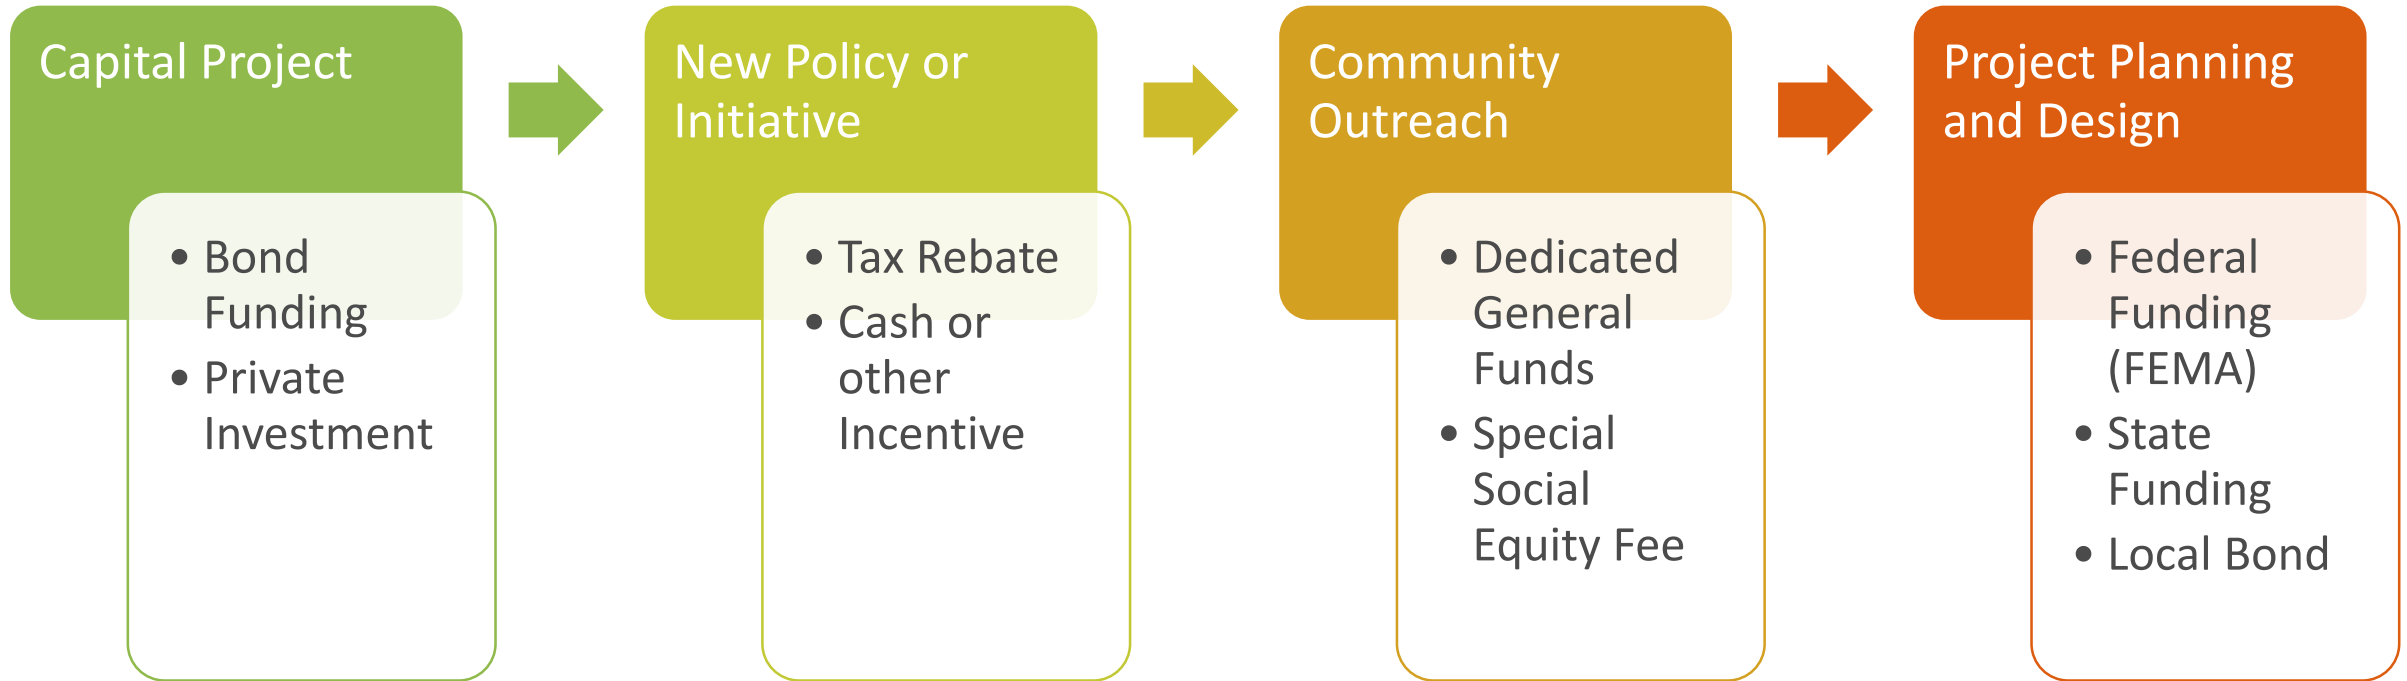

A successful funding strategy for resilience is built with multiple sources...

A Resilience Funding Menu

Align Strategies to Sources

**Break down strategy
elements and look for all
potential Funding**

Extreme Drought

Example Strategy

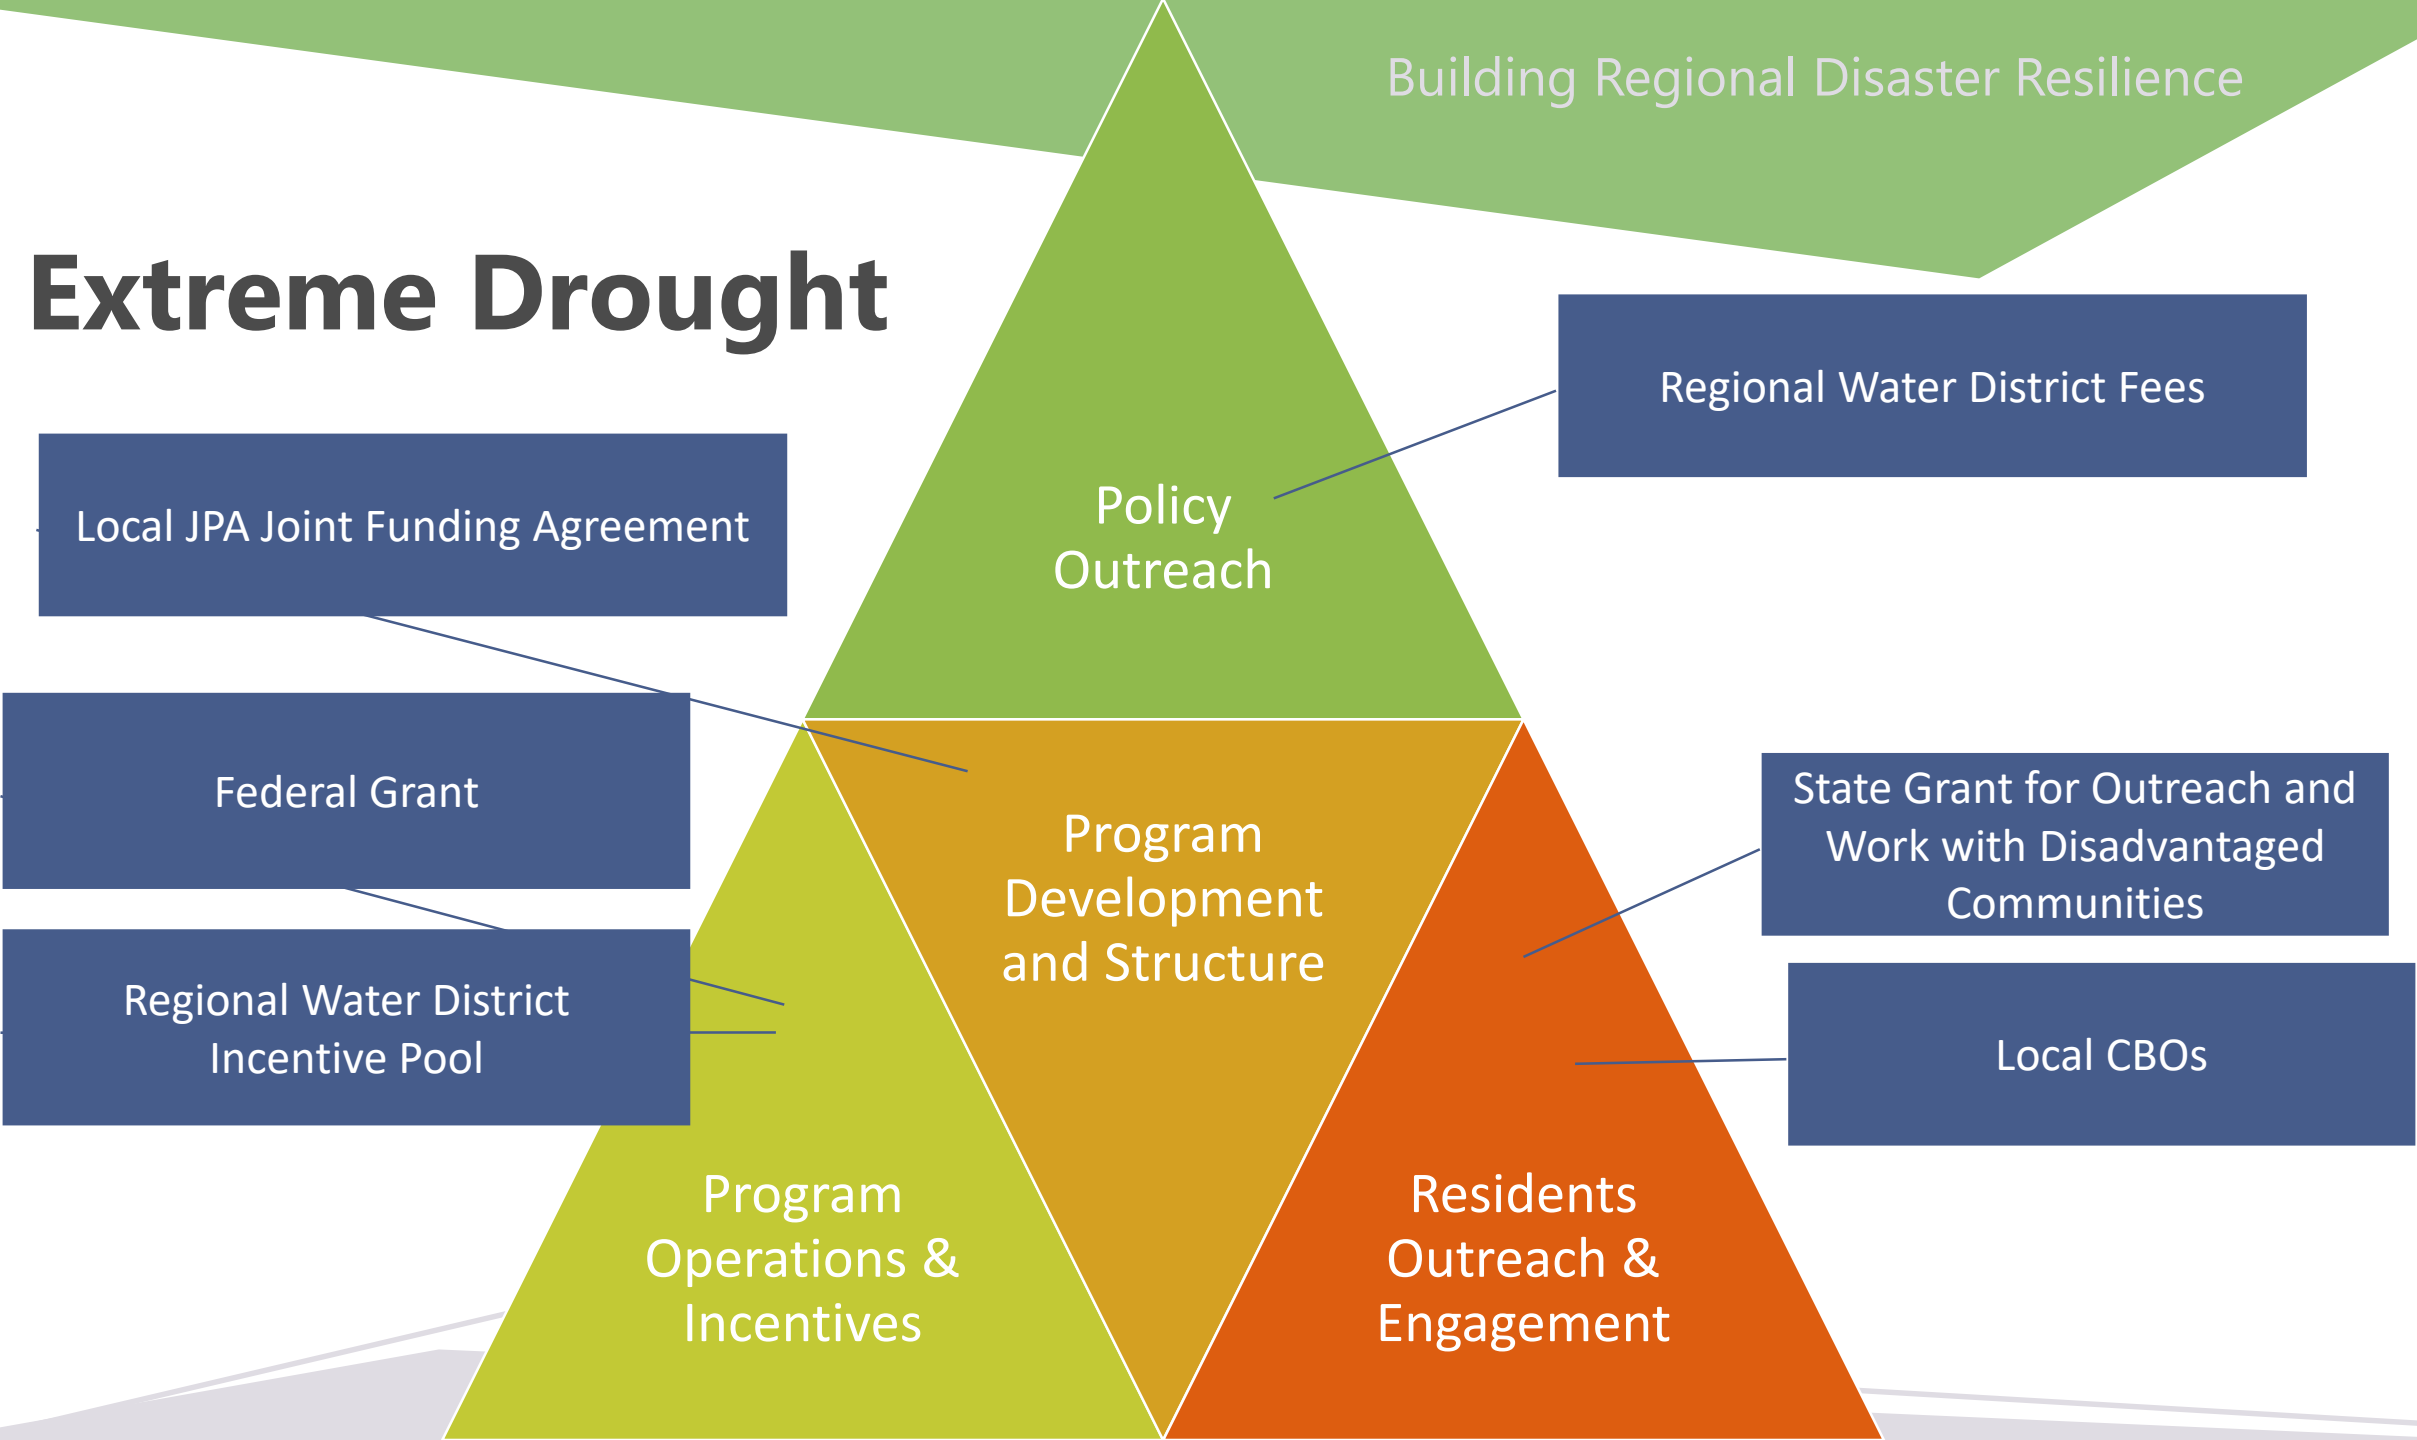

- Develop a region-wide “Lose your Lawn” policy, incentive, and education program to reduce residential landscape water use.

**Attend a FREE
Lose-Your-Lawn Workshop!**

A woman wearing a hat and sunglasses is sitting in a vibrant, multi-colored garden filled with various flowers and plants. The garden is well-maintained and shows a variety of species, including yellow, purple, and red blooms.

Learn easy and low-cost methods to convert your lawn into a beautiful, low-water use garden!

Extreme Drought

Policy Outreach

Regional Water District Fees

Local JPA Joint Funding Agreement

Federal Grant

State Grant for Outreach and Work with Disadvantaged Communities

Program Development and Structure

Local CBOs

Regional Water District Incentive Pool

Program Operations & Incentives

Residents Outreach & Engagement

Small Group Exercise

1. Briefly discuss and pick one of the following strategies to address the potential hazard.
2. Based on the earlier discussions, identify how to fund that strategy based on the funding needs identified.
3. Identify alternative approaches to align those strategies and projects to funding other than typical source, e.g. restate strategy, re-focus project objective, determine an element of the project or strategy that can be extracted and connected to new funding.
4. Funding should be appropriate for the kind of activity and will likely require several kinds of funding to implement.
5. **Prepare Report Back:** What was the funding mechanism used most frequently? What do you think your potential success will be? What are the main barriers to getting funding?
